CRAFTING GUIDE · COMPONENTS

Non-Purchasable Components // Sources

As of: Alpha **4.10.2** (game data from 22 Oct 2026). Sources below. Crafting and mission pools change with every patch – check in game before farming.

> **In short:** Of 560 ship components checked, **217 are in no shop**. 126 of those matter to players (the rest are internal NPC/ship variants). For **60**, the data names **missions as the blueprint source**, **7** came from an **expired event**, **41** have a blueprint **with no known source**, and **18** are **neither purchasable nor craftable** – those can only be found in ships.

01 What "non-purchasable" means – and how I checked

I queried the wiki API (`api.star-citizen.wiki`) for all ship components of the types shield, power plant, cooler, quantum drive, radar, ship weapon, mining laser, tractor beam and salvage head. **Non-purchasable** here means: no entry in the shop data **and** no purchase price at UEX.

- This is an **analysis of the available data**, not a guarantee. A shop may stock an item without the database knowing.
- Around 90 of the 217 are internal NPC/ship variants (e.g. "Mauler Shield Generator", "Main Powerplant"). You cannot obtain them, and they are **not** in the tables below.
- Classes (Military, Stealth, Civilian, Industrial, Competition) and grades (A–D) are explained in the wiki: grade A is the best tier; Military has the highest output with a large signature, Stealth has a low signature with mid-range output.

02 The four ways to get a non-purchasable component

WAY	HOW	WHAT YOU GET
A · Blueprint from missions	Complete contracts from certain mission givers; the reward is a blueprint from a pool	Blueprint (permanent), then craft it yourself

WAY	HOW	WHAT YOU GET
B · Event	Time-limited events	Blueprint – but only while the event runs
C · Find / pull from ships	Remove components from wrecks and ships	The component itself, no blueprint
D · Wikelo	Barter	The Wikelo list contains **no** ship components

WAY A – BLUEPRINT FROM MISSIONS (THE MAIN ROUTE)

According to the wiki, blueprints can be bought, earned as mission rewards, through reputation, or found in loot crates. A blueprint stays in your inventory permanently. A **Research Databank** unlocks better versions of a blueprint you know; you keep the lower tiers.

How the reward works: Each mission has a **pool** of blueprints (5 to 17, mixed from components, weapons and armor). The data lists a 100 % chance for every pool – you get one blueprint **from the pool**, and which one is random. So you cannot force a specific component; you repeat matching missions until it drops.

Which mission giver offers which components? (Rank = minimum reputation of that giver's contracts; higher contracts require higher ranks.)

MISSION GIVER	CONTRACTS	RANK PER DATA	AREA	COMPONENTS (NON-PURCHASABLE)
Foxwell Enforcement	"Protect/Defend Fuel Tanks and Escort Employees" (Yellow/Orange/Red)	Contractor to Veteran Contractor	Stanton, Pyro, Nyx	Coolers Glacier/Avalanche/Blizzard, Civilian coolers Draug/Elsen/Kragen, shield FR-86, power plant Radiance, repeaters CF-227 Badger, Attrition-4, CF-447 Rhino, CF-557 Galdereen, CF-667 Mammoth
Eckhart Security	Security/escort contracts, "Ambush" series, "High-Risk Bounty"	Contractor to Sr. Security Contractor	Stanton, Nyx	Stealth shields Mirage/Veil/Sheut/Umbra, power plants Slipstream/Eclipse/GammaMax, Fierell Cascade, UltraFlux, MegaFlux, Revenant Gatling
Headhunters	Bounty contracts ("Simple Hit", "Kill Order", "Primo Target" …) and "Defend … From Mercs"	Neutral to Elite Contractor	Pyro (bounty), Stanton/Pyro/Nyx	Stealth coolers SnowBlind/NightFall, shield 6CA 'Bila', Singe Cannon S1–S3, Tarantula GT-870 Mk 3, M8A Cannon
InterSec Defense Solutions	"Tactical Strike Group Needed", "Strategic Bombing", "Assist People's Alliance Vessel Tranquility"	not given in the data	–	Coolers Polar/Permafrost/Tempest, power plants JS-300/400/500, QuadraCell MX, shields ForceWall/CoverAll/FullBlock
Hockrow Agency	"Jorrit Dossier: Project Hyperion" (investigation)	not given	Stanton	Power plants DynaFlux, Bolide, Fulgur
Recco Battaglia (Levski)	Blackbox Retrieval, mining/salvage/scan contracts	Associate, Trusted Associate	Nyx	"Hazard-Zone" repeaters (CF-117/227/337), mining lasers Arbor MH1 and Pitman
Shubin Interstellar	"Purchase Order: Ship Mined Ore" (Lrg, Mjr, XL, Special)	Contractor to Head Contractor	Stanton, Pyro, Nyx	Radars BroadSpec and BroadSpec-Max, mining lasers Arbor MH1 and Pitman

MISSION GIVER	CONTRACTS	RANK PER DATA	AREA	COMPONENTS (NON-PURCHASABLE)
Ling Family Hauling	"Rookie Cargo Haul", "Cargo Hauling Opportunity"	Trainee/Rookie	all three systems	Stealth quantum drives Spectre (S1) and Spicule (S2)
Covalex	"Master Rank – Direct Bulk / Large Cargo Haul"	**Master** (very high rank)	all three systems	Quantum drives Siren, VK-00, XL-1, Yeager, Balandin, TS-2

What stands out:

- **Easy entry for stealth quantum drives:** Ling Hauling only requires Trainee/Rookie.
- **Military quantum drives are the long-term goal:** Covalex requires Master rank.
- **Foxwell and Eckhart** cover most of the combat components (coolers, shields, power plants, repeaters).
- The **Hazard-Zone repeaters** and the mining lasers come from the Battaglia line in Nyx (see also `Pyro_Nyx_Questgeber_Guide`).
- **Exactly which rank a given component needs** cannot be derived cleanly from the data – the ranks above are the range across all of a giver's contracts.

WAY B – EVENTS

The event "The Return of Xenothreat" (4.8.3, 2–15 July) gave blueprints as progress rewards: QuadraCell and QuadraCell MT at 60 %, FR-66 and FR-76 at 85 %, NDB-26/28/30 at 100 %. The event is **over**. If you did not unlock the blueprints back then, you can only get them if the event is repeated. If you have them, you keep them permanently.

WAY C – FINDING AND REMOVING COMPONENTS FROM SHIPS

18 components are neither purchasable nor craftable (list in 3.4, e.g. AllStop, Sukoran, Suldrath, Helios, Sovereign, BriskAir, Delphi). There is **no blueprint** for them, so all that is left is to find them somewhere.

What is documented:

- With salvage tools (precision tractor beam) you can pull weapons, shields, quantum drives and other modules out of wrecks, if you can reach them through a component bay. According to the comm-link, this statement dates from **Alpha 4.4**: components up to size 2.
- Community guides recommend salvage contracts and wrecks of NPC ships such as Vanguard, Scorpius and Prowler as a source of military and stealth parts.

What is **not** documented: whether this still works the same way in 4.10, and which component comes from which ship. I did not find that – please verify in game. Background is in your `SC_Salvage_Guide`.

WAY D – WIKELO

I checked your Wikelo list (`SC_Wikelo_Angebote_Uebersicht.xlsx`) against the component names: no match for shields, coolers, power plants or quantum drives. Wikelo is not a route for this guide.

04 Practical tips

1. **Pick the target first, then the mission giver:** Look up the component in table 3.1, note the giver, and repeat that giver's contracts.
2. **Build ranks:** Foxwell and Eckhart start at Contractor. Ling Hauling is the easiest entry (Trainee).

3. **Repeat instead of hoping:** The pool is random; you get one blueprint from the pool, not necessarily the one you want.
4. **Get materials beforehand:** The Item Fabricator shows the recipe and minimum quality; details in `Crafting_Bauplaene_Guide`.
5. **Re-check after patches:** Pools, ranks and contracts change. The numbers here are as of 4.10.2.
6. **No source ≠ impossible:** 41 blueprints have no known source in the data. That they arrive later is a guess; I cannot prove it.

05 What I am not sure about

- Whether "100 % pool chance" really means **exactly one** blueprint per contract. I read it that way because the wiki page for the mission "Recover Vanduul Tech" describes the same thing (one blueprint from a pool).
- Which rank is needed for which component (see above).
- Whether all 60 mission sources are currently offered in game. Contracts rotate.
- Whether components without a shop entry appear in a shop the database does not know.
- Whether an already known blueprint can drop again.
- How removing and looting components works in 4.10 exactly (Way C).
