STANTON · ASD · HOCKROW AGENCY — CONFIDENTIAL

ONYX · THE JORRIT CASE

Field handbook for the ASD Onyx investigation chain from the Hockrow Agency — the "Dr. Jerrod" missions (properly: **Dr. Logan Jorrit**). Phases 1–3, three wings, rewards for Wikelo.

INVESTIGATION · STORY · SOLO-FRIENDLY

SYSTEM	CONTRACT GIVER	START	REWARD
Stanton	**Hockrow**	**mobiGlas ▸ Investigation**	**ASD Secure Drives**
TEAM			
1–2			

CASE FILE · CONFIDENTIAL

SUBJECT	**Dr. Logan Jorrit** (often "Dr. Jerrod")
POSITION	ASD lead scientist, on administrative leave
ALLEGATION	cruel, unethical experiments on irradiated animals (Pyro I) to harvest **Valakkar pearls**
INVESTIGATOR	Hockrow Agency — contact **Arken Mallor**

The **Onyx facilities** are abandoned underground ASD research stations — one facility **cloned ~120×** across Stanton (Hurston 40 · microTech 32 · ArcCorp 24 · Crusader 24; code S{system}{body}{no}). Access is via **two large hangar doors** on the surface only. You work through **Engineering** (Sector A) and **Research** (Sector B, 9 sub-levels) to **Site B**, download data, hear audio logs — and uncover "Project Hyperion". Rewards are traded at **Wikelo's Emporium**.

▷ Getting in — how to start

Unlike the ASD Labs/Hathor: this one is mission-driven.

THE "START BUTTON"

Open your **mobiGlas → Contracts → Investigation tab** and accept the **Hockrow Agency** contract from **Arken Mallor**. Only then do you get the **quantum marker** to the facility — the Onyx sites are otherwise **not directly reachable**.

CONTRACT TYPE

🔍 Investigation

Hockrow / Arken Mallor. The story chain: download data, audio logs, explore wings.

CONTRACT TYPE

📦 Hauling

Redwind: deliver items to the **freight elevators** in the Onyx facilities.

CONTRACT TYPE

🎯 Mercenary

Eckhart / Bounty Hunters Guild: destroy **servers** in the facilities, clear targets.

SOLO & REWARDS

Doable solo or in a duo. **Note:** rewards currently go **only to the player who accepted the mission** — shared rewards aren't available (yet). In a team, everyone takes their own mission.

▤ The three wings

How every Onyx facility is laid out.

WING 1

Research Labs

Data points + **audio logs** revealing why the facility was abandoned. The story lives here.

WING 2

Engineering

Route through **hazardous power systems & radiation zones**. Bring protection.

WING 3

Site B

The deepest section: **Jorrit's lab**. Requires the Phase 1 & 2 data.

▶ The investigation chain — phases

In order; phase 3 requires phases 1 & 2.

1 FILES — Phase 1 — gather files (P1M1–M3)

REWARD: 5 ASD SECURE DRIVES

1. **P1M1** pull personnel files at the reception terminal (intro, few enemies).
2. **P1M2** listen to the audio device mid-**Engineering** wing (pirates, rarely a Valakkar).
3. **P1M3** pull research data in the **Research** wing (marker leads; best Volt-Zenith route).

2 Phase 2 — extract data (P2M1–M4)

DATA

REWARD: 10 ASD SECURE DRIVES (+1 PER MISSION)

1. **P2M1** energy-anomaly data (ground pulses <5 m, loot from cover).
2. **P2M2** hack the security console — **highest NPC density** (AP ammo + grenades).
3. **P2M3** seismic data (tight corridors → SMG).
4. **P2M4** power-usage logs in the **power-core dome**: ⚠ **radiation pulse every 30 s** — cycle behind struts Alpha/Beta/Gamma.

> FARM LOOP
>
> Once cleared, the P2 missions become **repeatable** (1 drive per turn-in) — the long-term farm for Wikelo artefacts.

---

3 Phase 3 — Project Hyperion (Site B)

HYPERION

REWARD: ASD COMPOUNDS (2 SCU CONTAINERS)

1. Via the **SL1 elevator branch** (SL9 atrium → SL1 → Site-B spur) into the cave system below Research.
2. Recover **xenotech samples** from the Hyperion lab's antechamber + disposal area. (Story: the test subject on the machine is a disfigured Vanduul → leads to the Vanduul-Tech Smugglers.)

---

4 Boss — Yormandi (Site C, since 4.3.2)

YORMANDI

OBJECTIVE: CREATURE BOSS IN THE CAVE BEYOND HYPERION

1. Only on the **Site-C variant** (multi-storey elevator shaft at the entrance): beyond the Hyperion lab, past the horizontal cargo sled, lies the **Yormandi cave**. The arena **seals on entry**.
2. Creature boss with **8 weak-spot zones** (working again since 4.9). Two-phase fight; a second Yormandi triggers.

> WIKELO LINK
>
> The Yormandi drops **2× eye + 1× tongue** — pure **Wikelo trade goods**. Plus you trade **ASD Secure Drives & Compounds** at **Wikelo's Emporium** (Dasi/Hurston · Selo/Crusader · Kinga/microTech) — don't sell, keep them! Straight into your Wikelo planner.

A Loadout checklist

◆ = mandatory · ▣ = recommended.

🧰 Tools & protection

🔫 Combat & transport

- **Full spacesuit + helmet + flashlight**
  Oxygen required; the facility is dark.
- **Radiation chestplate (Pembroke/Inquisitor)**
  For the **power core / P2M4** (30 s pulse) — otherwise cycle behind struts Alpha/Beta/Gamma.
- **Multitool + tractor beam · med-pens (5+)**
  Tractor beam for loot handling; 3× T1 medbeds in the lobby to top up.

- **Solid FPS weapon + spare**
  Enemies are "light" in the investigation, tougher in mercenary contracts.
- **Ship with some cargo**
  For hauling contracts & to haul reward containers (2 SCU) and loot.
- **Patience for logs**
  The audio logs are optional but carry the whole story.

$ Loot & rewards

Contract pay + on-site loot. Patch-dependent.

ITEM	SOURCE	NOTE
ASD Secure Drives	Phase 1 / 2	`5×` / `10×` — trade at Wikelo.
ASD Compounds	Phase 3 (Site B)	2 SCU containers, amount depends on experiment outcome. Wikelo.
Yormandi eyes & tongue	Boss (Site C)	`2× eye · 1× tongue` — Wikelo trade goods.
ASD Lab Sample	World spawn (since 4.8)	Turquoise cryo vial in **blue crates** (SL8 medical, Hyperion, Site-B tunnels); ~1M aUEC via Hockrow "ASD Lab Sample".
Volt Zenith · RCMBNT · Corbel	on site	Energy sniper (P1M3 racks); RCMBNT artefacts T1–3; Corbel/Novikov only on Site C.
ASD Geist Stealth Suit	on site	In **orange loot boxes**; Stirling Exploration (ASD) densest in Site-B.
Geist blueprints	Jorrit Dossier contracts (repeatable)	Each completion grants **one blueprint** from that contract's pool (Corbel/Novikov/Zenith/Fresnel besides Geist) — contract → variant mapping in the box below.
Assorted facility loot	on site	Weapons/armor/components in rooms & boxes.

BLUEPRINT MAPPING: CONTRACT → GEIST VARIANT

Updated Security Data (P2M2) → Geist base · **Updated Energy Anomaly Data** (P2M1) → Forest · **Updated Seismic Data** (P2M3) → Whiteout + Desert · **Updated Power Usage Data** (P2M4) → Rogue + Whiteout · **Onyx Personnel Files** (P3MM) → ASD Edition · **Snow Camo** → Wikelo only (no contract). Cost per blueprint: core Taranite 40 / Aslarite 20 / Stileron 40 · arms & legs 30/20/30 · helmet 20/10/20 (refined). Pool reward with equal weights → a specific

piece may take several runs (our reading of the star-head data, as of 2026-10-30). **No** blueprints for Epoque, Golden Blossom or Stronghold.

Common pitfalls

Flew there without the mission

Without an accepted Hockrow contract there's no marker & no real access.

Searched SL2/SL3

These research levels are **inaccessible** — any door hunt is wasted time.

Radiation in the power core

Pulse every 30 s. Without a chestplate, cycle behind Alpha/Beta/Gamma — in, loot, out.

Phase 3 too early

Site B needs the Phase 1 & 2 data — do the chain first.

Expected shared rewards

Only the mission holder is rewarded. Everyone takes their own.

Didn't trade the reward

Redeem the Secure Drives / Compounds at **Wikelo**.
