PYRO SYSTEM · PVPVE · CONTESTED ZONES

# PYRO CONTESTED ZONES

Field handbook for the Pyro contested-zone series — Checkmate, Orbituary & Ruin. Goal: collect **7 Comm Boards** and trade them at the Executive Hangar for a **ship**. A team is strongly advised.

FREE-FIRE · VERY HIGH PVP RISK

| SYSTEM | STATIONS | GOAL | TEAM |
|---|---|---|---|
| Pyro | Checkmate · Orbituary · Ruin | 7 Com Boards → ship | 3–4 |
| RISK | | | |
| VERY HIGH | | | |

**What this is:** Contested zones are **free-fire PvPvE zones** on three Pyro stations. You fight NPCs **and other players** for rare FPS gear, grade-A components — and for the **7 Comm Boards** that together unlock a ship.

Progress runs through **color-coded doors**: blue (security) → red (supervisor) → fuse doors. The boards sit behind the hardest of these. The endpoint is the **Executive Hangar**, where you trade the boards for a ship.

## Getting in & door lore

Location-based — just fly in. The key is the door system.

THE "START BUTTON"

No mission needed: pick one of the three stations as a quantum target and dock. The **"Collect 7 Comm Boards"** objective is location-based. It's **free fire** — any other player can be hostile.

**Blue door**
**Security keycard** — printed at card printers **inside the zone**.

**Red door**
**Supervisor keycard** — only printed at the **Supervisor**

**Fuse door**
Open with a **Fuse** (salvaged/bought). If it jams,

**terminals PYAM-SUPVISR-3-4 & 3-5** (Pyro III outpost, a.k.a. "PYRO03 L4/L5"), 30-min cooldown. Leads to the best rooms.

nudge it with a **tractor beam** like cargo.

### Timer door

Ruin only (entry to the Vault): opens ~**1 min**, then stays shut ~**20 min**. Time your run.

### Gold keycards (Ruin)

The Ruin Vault sectors **Crypt**, **Last Resort** & **Wasteland** each have their own gold key (marked "... Key" on the map) that opens that sector's door.

## The three stations

PYRO · BOARDS 1–3

### Checkmate Station

Most boards. Card printers on site.

- **3 Com Boards** (Board 1 in the north sector behind blue+red doors; Boards 2 & 3 in the west cluster by the freight elevator, blue access)

PYRO · BOARDS 4 & 7

### Orbituary Station

Tighter, lots behind red doors.

- **2 Com Boards** (Board 4 by the Loot Zone/fuse door; Board 7 in the north-east hangar behind blue+red doors)

PYRO · BOARDS 5 & 6

### Ruin Station

Sectors: "The Wasteland", "The Last Resort", "The Crypt" (gold keys) + a **timer door** to the **Vault**.

- **2 Com Boards** (Boards 5 & 6 in the **Vault** — past the timer door, near the Crypt door resp. the freight elevator)

## Comm Board tracker (7)

All seven at a glance — work your way through.

TERM

**Comm Board = Compboard** — labelled **"Tablet 1–7"** on the community maps below. Same thing, different name.

| # | STATION | LOCATION (SEE MAPS) | ACCESS |
|---|---|---|---|
| 1 | **Checkmate** | North sector, near Extract | Blue + Red |
| 2 | **Checkmate** | West cluster (freight elevator), lower | Blue |
| 3 | **Checkmate** | West cluster (freight elevator), upper | Blue |

| # | STATION | LOCATION (SEE MAPS) | ACCESS |
|---|---|---|---|
| 4 | **Orbituary** | Loot Zone (west), by a fuse door | Red + Fuse |
| 5 | **Ruin** (Vault) | Vault, near the Crypt door (south) | Timer + Gold |
| 6 | **Ruin** (Vault) | Vault, top by the freight elevator | Timer + Gold |
| 7 | **Orbituary** | North-east hangar, near Extract | Blue + Red |

ORDER TIP

Get red keycards first (Supervisor terminals, 30-min cooldown, only 2 per session usable at Checkmate & Orbituary). Then work Checkmate → Orbituary → Ruin. Take boards **to your ship early** — a death loses them.

---

## ★ Redeem: Executive Hangar

All 7 boards → one ship. Timing is everything.

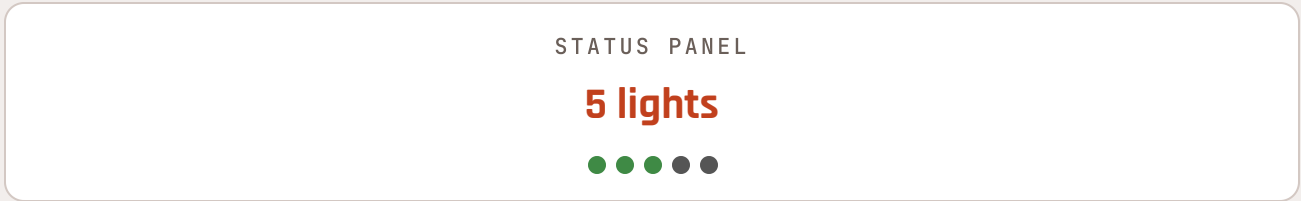

### 1 PYAM — Find the active base (PYAM-EXHANG-0-1)

3 ASTEROID BASES · ONLY 1 ACTIVE

1. The redemption sites are **PYAM-EXHANG-0-1**: three small **asteroid bases near the Pyro sun** (south-west of the star). Only **one** is active at a time.
2. Fly over, **EVA out** nearby and float to the hangar entrance — access is gated from outside by **status lights** (phase 2).

### 2 LIGHTS — Read the status lights

OPEN: ≥ 1 GREEN AND NONE RED

1. The hangar has a panel of **5 status lights**. It only opens when **at least one is green** and **none is red**.
2. Charging: roughly **one more light turns green every 24 min** (up to ~2 h "full"). Once open it loses **one green every ~12 min** → usable window ~1 h.

RED LIGHT = LOCKED

If even **one light is red**, the hangar stays shut — skip this base or wait for it to cycle back to green/off.

---

## 3 Insert 7 boards & pick a ship

BOARDS

1 OF 8 EXECUTIVE SHIPS

1. Inside, insert all **7 Comm Boards** into the console. Then choose **one** ship from the list — plus **rare FPS weapons** and **grade-A components**.

MILITARY/STEALTH

- F7A Hornet Mk II Executive
- F8C Lightning Executive
- RSI Scorpius (Wikelo War Special)

MULTI/CARGO

- RSI Corsair Executive
- Drake Cutlass Black Executive
- Gatac Syulen Executive

RSI / MIRAI

- RSI Meteor Executive
- Mirai Guardian MX (Wikelo War Special)

## 4 Retrieve the ship at ASOP

ASOP

HANGAR CLOSES AFTER 10 MIN

1. Request the chosen ship at the base's **ASOP terminal** — the hangar opens, but **closes again after ~10 minutes**. Fly it out promptly.

## A Loadout checklist

◆ = mandatory · ▣ = recommended. Teamwork is mandatory here.

### Protection & combat

- ◆ **Heavy armor**
  Torso/head essential; light leg armor for speed is fine.
- ◆ **Primary + min. 200 rounds**
  e.g. PR-4. NPCs and players take a lot.
- ▣ **Med-Gun + Med-Pens**
  Mutual healing decides fights.

### Tools & logistics

- ◆ **Multitool with tractor beam**
  For jammed fuse doors (move like cargo) & loot hauling.
- ▣ **Fuses**
  Salvaged or bought — for the fuse doors (esp. Ruin).
- ▣ **Beverages & safe ship parking**
  Don't forget hydration; park the ship safely (no drift/damage).

## $ Loot & rewards

Besides the boards, top-tier gear. Patch-dependent.

| ITEM | TYPE | NOTE |
|---|---|---|
| **Ship (1 of 8)** | End reward | For all 7 Comm Boards, at the Executive Hangar (PYAM-EXHANG-0-1); "Executive" variant + high-grade components. |
| **Rare FPS weapons** | FPS | e.g. grenade launchers & railguns with upgraded stats. |
| **Grade-A components** | Ship parts | High-value; incl. in the hangars. |
| **Com Boards** | Quest item | **7×** — the actual "series". |

## Common ways to die

**Went in solo**
No revives, easy prey. A team is basically mandatory.

**Carried the boards**
Lost on death. Bank to ship early & often.

**Forgot the red keycard**
Without a supervisor card, no access to most boards. Plan for the 30-min cooldown.

**Missed the status window**
Hangar lights expire (red/off). Finish all 7 boards first, then head to the active base with a green panel.

**Engineering-door trap**
The engineering door (alarm, ~30-min cycle) **kills anyone inside when it shuts**. Never be in the room as it closes.

**Blew the timer door (Ruin)**
The Vault timer door is only open ~1 min, then shut ~20 min. Be ready before it opens.

**Parked the ship badly**
Drift/damage/theft. Park safe; have someone watch it.

**Fuse door jams**
Bug: pull it open with the tractor beam like cargo.
