🎯 NYX SYSTEM · INTERSEC · CO-OP FLEET OPERATION

TACTICAL STRIKE GROUPS

Field handbook for SC's first dedicated **co-op ship-combat operation** (4.8): 5 phases, a role-based squadron, from Idris defense to the Vanduul Mauler. Reward: crafting blueprints.

SQUADRON · ROLES · COORDINATION

SYSTEM	SITE	GIVER	SQUAD
Nyx	QV Extraction Station	InterSec	7+ (4–5)
REWARD			
Blueprints			

What this is: Star Citizen's first dedicated **co-op ship-combat operation** — a multi-phase mission built on **role specialisation** and team coordination. **InterSec Defense Solutions** tasks you with rescuing a downed People's Alliance pilot from a QV extraction station in **Nyx**. Designed for a **squadron of 7+ ships** of varied classes; doable with **4–5 coordinated** pilots.

> MANDATORY: BALLISTICS
>
> **Ballistic weapons & missiles are mandatory** (by phase 2 at latest): energy weapons **cannot** damage the armored doors/relays. Without ballistics the whole group stalls.

▷ Getting in — how to unlock it

Mission-driven, with a reputation gate.

> THE "START BUTTON"
>
> Reach **Contractor rank with InterSec Defense Solutions** (in Nyx). Then, in **mobiGlas → Contracts → Mercenary tab**, accept the **"Tactical Strike Group Needed"** contract. Assemble the group & assign roles first.

Squadron composition

By role. At least one Idris/Polaris as an anchor helps a lot.

ROLE

Fighters

Power cores & trench run, air support.

`Gladius · Arrow · Buccaneer · F7 · F8`

ROLE

Sub-capital / military

Air superiority & the relay assault.

`Perseus · Paladin · Constellation Andromeda · Corsair`

ROLE

Capital

Support, rearm/repair anchor & the finale.

`Polaris · Idris`

The 5 phases

In order; the Idris "Tranquility" serves as rearm/repair throughout.

01 IDRIS

Defend the Idris "Tranquility"

OBJECTIVE: REPEL ALL FIGHTER WAVES

1. Protect the friendly **Idris** against successive fighter waves. It provides **rearm/repair** for the whole op.
2. Enemies incl.: F7C Mk II, Paladin, Ares Ion, Perseus, Buccaneer, Constellation, Scorpius, Corsair.

02 RELAYS

Power relay assault

OBJECTIVE: 4 ARMORED DOORS + TURRETS

1. Destroy the **4 reinforced metal doors** covering the power relays with **ballistics** (energy does nothing!).
2. Neutralize the **3–4 anti-capital turrets** on the struts and near the central tank.
3. Return to the Idris between assaults to **repair/rearm**.

03 TRENCH

Trench run & core

OBJECTIVE: 18 COOLERS + CENTRAL CORE

1. Take **light fighters** through the narrow asteroid tunnels. Destroy **18 cooling units** (6 each at Gate A, B, C), then the **central core**.
2. **Distortion fields** disable components — mantra: **"enter fast, acquire target, fire as you pass, exit immediately"**.
3. After the core, a **second wave** (capitals + heavy fighters) attacks the Idris.

> **GATE ASSIGNMENT**
> Assign pilots to Gate A/B/C — otherwise the tunnels clog up.

04 Pilot rescue (on foot)

FPS

OBJECTIVE: FREE & EXTRACT THE PILOT

1. Into the station via a landing pad. Min. **2 operators**. Use a **ladder into the ventilation** to reach the sealed security room.
2. Activate the **security terminal** to release the captured UEE pilot. Loot en route: **Virgil flightsuits**, helmets, components in side hangars.
3. During extraction, protect the **pilot's Freelancer** against Vanduul fighters.

> **SETUP**
> Keep escort fighters outside to cover the extraction vessel while the FPS team is inside.

05 Vanduul Mauler (boss)

MAULER

OBJECTIVE: DESTROY THE CAPITAL BOSS

1. A **Vanduul Mauler** (capital cruiser) intercepts the extraction. Concentrate all firepower.
2. **Capitals:** sustained concentrated fire at close range. **Fighters:** neutralize Vanduul fighters + secondary damage to the Mauler.

A Loadout checklist

◆ = mandatory · ▣ = recommended.

🚀 Ship weapons

- ◆ **Ballistics: cannons/gatlings/torps/missiles** Mandatory for phase 2 — energy-only loadouts fail.
- ▣ **Light fighters for the trench** Agile enough for the tight tunnels & distortion fields.
- ▣ **Idris/Polaris anchor** Rearm/repair & heavy firepower for the Mauler.

🎒 FPS gear

- ◆ **Armor + primary** Heavy (Pembroke, Morozov) or medium (Artimex, DustUp); Gallant Rifle / Pulverizer LMG.
- ▣ **Sidearm + ammo** Coda pistol or similar; standard backpack + spare ammo.
- ▣ **Med-Pens** 3–5 (Hemozal) minimum for phase 4.

$ Rewards — blueprints

One random blueprint per completion from either pool (permanent, craftable). Multiple runs needed.

POOL	CATEGORY	BLUEPRINTS
1	Equipment	Racing flight suits (Whitehot, Blackfire, Blueflame) & matching helmets · Tailwind helmets (Thunderstruck, Frostshock, Airwolf, Blue Skies) · Novia crossbow (Base, Nighthunter, Ghostmaker, Wildshot)
2	Ship components	Omnisky II / VI / IX / XII / XV / XVIII · Power plants JS-300, JS-400, Quadracell MX

× Common pitfalls

No ballistics
Energy weapons can't open the relay doors → phase 2 impossible. Check beforehand!

Unclear roles
Assign roles & gates before launch — otherwise chaos.

Trench congestion
Everyone in one tunnel = collisions. Split A/B/C.

Extraction ship uncovered
In phase 4 the pilot's Freelancer must survive — keep an escort outside.

Idris falls
Without the rearm/repair anchor the op collapses. Always keep it covered.

Expected 1 run
Blueprints are random — collecting all takes many runs.
