☢ PYRO SYSTEM · ASD LABS · FIELD OP

Lazarus Complexes

Field handbook for the ASD research facilities in Pyro — from the data-center infiltration on Pyro IV to the Apex Valakkar kill on Pyro I. For 2–3 players.

ASSOCIATED SCIENCES & DEVELOPMENT

SYSTEM	TARGETS	TEAM	DURATION
Pyro	Pyro I + IV	2–3	~60–90 min
THREAT			
EXTREME			

What this is: The ASD Labs arrived with the **Stormbreaker event (patch 4.2)** and have grown since (e.g. 4.3.1). It's a multi-stage co-op activity, almost a mini-raid: first you infiltrate a **Farro Data Center on Pyro IV** to print a "Specimen Card", then travel to the **Lazarus Complex on Pyro I**, wake a huge creature, kill it, and harvest rare materials and gear.

The facilities are **unmarked on the map**. What kills most players isn't the enemies — it's the environment and three or four rules nobody knows going in. Those are exactly what's below.

▷ Getting in — how to start

No mission to accept. It's location-based.

> THE "START BUTTON"
>
> There's **no mission giver, no mobiGlas acceptance, no known reputation gate**. You begin the activity simply by **flying to one of the ~10 Farro Data Centers on Pyro IV** and starting phase 1 on site.

- **Location-based, no mission board** More like a dungeon/POI: fly there and operate the objects on site — nothing is marked on the map; you navigate to the data centers and "Lazarus" terminals yourself.

- **The Specimen Card is the key** Printed first in the Pyro IV data center (phase 1) — it's what unlocks the Egg Room & boss on Pyro I. Nothing else works without it.
- **Bring 2–3 players** The data-center QRF and the boss need firepower; the ATLS-RAD step and one door terminal even require two players at once.
- **"Event" vs. location** Introduced with the Storm Breaker event (4.2) — but the facilities are persistent locations; the activity runs location-based (no fixed time window per sources, patch-dependent).

! The 5 deadly rules

Read this before you launch — most runs die here.

☢ Radiation

Without a **Stirling Protective Suit** or decontamination pens the megastorm downs you in seconds. The Egg Room is impassable without the Stirling.

Power cut at 12 km

Over Pyro I **ships lose power at 12 km altitude**. Don't fly in manually — take the automated shuttle from the transit hub.

Distortion field

A field disables **every vehicle except the ATLS IKTI RAD**, which you unlock on site.

🥚 No tractor beam on the egg

Carry the egg **by hand only**. Tractor beam → physics bug, egg clips through the floor = failure.

🎯 Only green pustules count

On the boss **only damage to green pustules or the mouth** registers. Everything else is wasted ammo.

A Loadout checklist

◆ = mandatory · ▣ = strongly recommended. Buy in Stanton/Ruin before launch.

🧑‍🚀 Suit & protection

- ◆ **Stirling Protective Suit** Radiation protection + access to the Specimen/Egg Room. Buy at Stanton Gateway or Ruin.
- ▣ **Decontamination pens** Mandatory if you wear heavy armor instead — manages your radiation load.

🔫 Weapons & ammo

- ◆ **LMG + plenty of ammo** Rule of thumb: ~**4,000 rounds** of LMG for a 3-person team, just for the boss.
- ▣ **Multi-Tool (2 attachments)** Tractor attachment for fangs, mining attachment for pearls.

- **Med-Pens** Also to briefly "wake" knocked-out scientists for biometric scanners.

- **Backup armor** Set respawn early (see phase 2) — deaths are expected.

The op — phase by phase

The order is mandatory: no Specimen Card from Pyro IV, no Egg Room on Pyro I.

01 — Infiltrate a Farro Data Center

PYRO IV

OBJECTIVE: ASD KEY CARD + PRINT THE SPECIMEN CARD

1. Head to one of the Farro Data Centers on **Pyro IV**. Start at the `Emergency Shelter` by the courtyard.
2. Take the **ASD Maintenance Key Card** from the desk in the emergency shelter.
3. Open secure rooms: take down NPC scientists **non-lethally**, drag them to the biometric scanner, med-pen them awake briefly — *or* steal their clothing to bypass scanners.
4. Read the **5-digit code** off a laptop in `Data Processing`.
5. Enter the code into **Tower 01** → starts a **3-minute print**. Interact with the console again at **50%**.

> WARNING
>
> A **Quick Reaction Force (QRF)** spawns during printing. One player prints/defends the console, the others hold the door.

02 — Arrive at the Lazarus Complex

PYRO I

OBJECTIVE: ARRIVE ALIVE & SET RESPAWN

1. Jump to **Pyro I**. Do **not** fly manually below 12 km — land at the transit/shuttle station and take the **automated shuttle** (~25 km trip).
2. On arrival, **set your respawn point at the exterior infirmary buildings**. That way a death doesn't cost you the whole trip.

> TIP
>
> The Lazarus Complex is unmarked — look for **"Lazarus" terminals** to find the shuttle depots.

03 — Unlock the ATLS IKTI RAD

ATLS-RAD

OBJECTIVE: THE ONLY VEHICLE THAT WORKS IN THE FIELD

1. Use the **ASD key card** to open the **battery storage garage**.

2. Install the battery — then **two players simultaneously** press the two door terminals to reach the suit.

> WHY IT MATTERS
>
> The **ATLS IKTI RAD** is immune to the distortion field and shields against high radiation — the only exception in the field, and found only at the ASD facilities.

---

04 Specimen Cache (Egg Room)

EGG ROOM

OBJECTIVE: "COOK" THE EGG

1. **Put on the Stirling Protective Suit** — no entry without it.
2. Use the printed **Lazarus Specimen Card** to start the cooking process. This **triggers alarms** and requires **one** console interaction during the countdown.

> TIMER
>
> The cooked egg has only a **15-minute expiry**. The clock is running now — go straight to phase 5.

---

05 Carry the egg to the Calling Tower

CARRY

OBJECTIVE: DELIVER THE EGG INTACT

1. Carry the egg **by hand**, on foot. **Smaller worms** spawn along the way to harass you; the team keeps them off.
2. Place the egg at the Calling Tower → summons the boss.

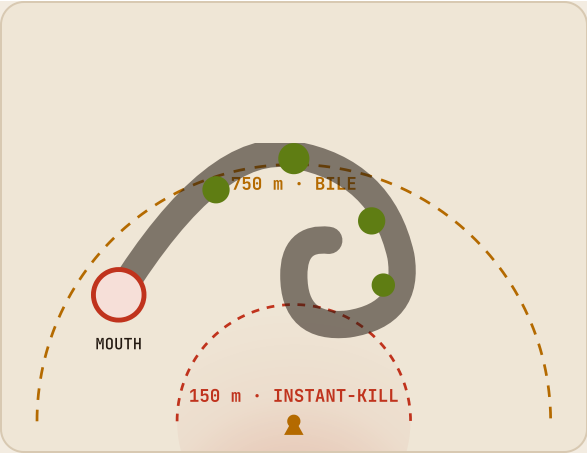

> CRITICAL
>
> **`No tractor beam.`** Physics bugs drop the egg through the geometry and the run is lost. Slow and on foot wins.

---

06 Apex Valakkar — the boss

BOSS

OBJECTIVE: HIT WEAK POINTS, KEEP SPACING

- **Green pustules + mouth**
  The **only** zones that register damage. Watch for a **green splash** to confirm hits.
- **150 m — ground slam**
  Instant death within the radius. **Never closer than 150 m.**
- **750 m — bile spit**
  Ranged attack. **Sweet spot: hold 150–750 m** and fire.

> AMMO GUIDELINE
> Budget ~**4,000 LMG rounds** for a trio. Fire only when a green zone is exposed — otherwise you save ammo.

07
EXTRACT

Harvest & extraction

OBJECTIVE: SECURE LOOT WITHOUT LOSING IT

1. Harvest **Valakkar fangs (6)** with the **tractor attachment** on the multi-tool.
2. Harvest **Apex pearls (15)** with the **mining attachment**.
3. Drop loot into the complex's **freight elevators** — one-way storage, accessible only at the transit hub. That protects it from a death.

> TIP
> You'll also find **armor & weapons** (see loot table) in the complex rooms — grab them while sweeping and ship them out via the freight elevator too.

$ Loot & rewards

What makes it worth it. Drops vary by facility/patch.

ITEM	TYPE	WHERE / NOTE
ATLS IKTI RAD	Power suit / mech	Radiation- & field-immune; exclusive to the ASD facilities.
Prism "Bonedust"	Laser shotgun	In the Lazarus rooms on Pyro I.
Stirling Exploration Suit (ASD Ed.)	Armor + helmet + backpack	Set found in the Lazarus rooms.

ITEM	TYPE	WHERE / NOTE
Corbel Armor	Armor set	From 4.3.1, Research Wing "Site B"; several loot boxes for the full set.
Valakkar Fangs	Material	**6×** — tractor attachment.
Apex Pearls	Material	**15×** — mining attachment. Also relevant as Wikelo trade goods.

Common ways to die

Quick pre-run check.

Flew in manually

Power cut at 12 km → crash. **Always** take the shuttle.

Egg Room without Stirling

No access / radiation death. The suit is mandatory.

Tractor beam on the egg

Egg clips through the floor = run over. **Carry** only.

Too close to the boss

Ground slam under 150 m = instant death. Keep spacing.

Shot the body

No damage off the green zones → out of ammo, boss full HP.

No respawn set

One death costs the whole trip. Set it early at the infirmary.
